

## **Go/No Go**

This opportunity will be offered to the first **15** people who pay in advance and register. Once payment is received, you will get an official registration form in your PayPal registered email inbox. Upon receipt of this e-mail, your seat is confirmed. I will periodically update the webpage with registration counts and the seats are available on a first come first serve basis. If less than 10 people register for this workshop by February 29, 2020, we reserve the right to cancel the class. If that happens, refunds will be processed to those individuals that have paid in advance. If the seats fill up, we will maintain a wait list for any interested individual in the case of cancellations. Refunds will be offered until 30 days prior to the event less any fees incurred by PayPal. A refund will forfeit your seat and it will be offered to the next available individual.

## **Rain or Shine**

This event will happen rain or shine. The workshop will be held indoors but this is a dark sky facility and we will be taking advantage of what this facility has to offer if weather permits. As always with what we do, clouds and bad weather can happen.

## **Mounts and Your Equipment**

Due to the nature of different mounts, cameras and telescopes, we will not cover instruction on how to setup and use your own equipment if you do not know how to use it. This workshop will be targeted toward individuals who wish to learn more about the processing aspect of astrophotography. You really should at least know how to acquire raw data from your equipment in order to take full advantage of this workshop. If you wish to learn more about your own equipment and how to use it, I offer personal one on one instruction for those interested. Please contact me privately about these offerings.

## **Star Party Etiquette**

This workshop will maintain a star party atmosphere in the evening. General star party behavior will apply such as no loud music, red lights only after dark and vehicles in or out on an as needed basis. Lasers are only permitted by staff for instructional purposes. General 3RF rules apply. Any individual on campus during the Workshop will be required to sign liability release and "Hold Harmless" forms as soon as they arrive. The campus is a safe, fun and friendly environment but it should be no surprise that we will be in the country and caution is necessary.

## **Meal Plan**

As an optional add-on to the offered package, a meal plan will be available. The meal package will be for lunch and dinner on the three main days of the workshop only (Wed-Fri). The menu is TBD but expect something very similar to what you see at star parties or better. Also, if you do decide to opt *out* of the meal plan, understand that the nearest town is 20 minutes away from the campus. Even then, choices are slim but there is a pizza place and a BBQ place. Vernon, TX will be another half hour or so away with more options as well as a Wal-Mart. Please plan accordingly. The meal plan menu will be available at a later date.

## **Bunkhouse Accommodation**

Included with your package will be bunkhouse lodging. The bunkhouses are very nice and climate controlled. An extra bunkhouse is included for potential female registrants. No bedding or pillows will be provided. You should plan to bring a sleeping bag/blankets and your pillows for the bunk.
